

# LS-200T

The LDA LS-200 acoustic box is an ideal high performance speaker for exterior and interior sound that requires high sensitivity and power.

It is made from a 10" high-resolution woofer and a 1.4" compression motor accompanied by a speaker to record better sound diffusion.

Thanks to the bass reflex system you get extended bass response.

The back of the box is made of contrasted, textured wood.

The LS-200T can be mounted on a support with adjustable inclination, or with support for either rear or technical support.

The LS-200T has an input with a Speakon connector located on the rear side of the cabinet.
