The LS-81T of LDA is a acoustic box, which is compound by a 8" high performance woofer and a 1 " tweeter made of Polycarbonate.

This acoustic box has been designed for installations where a high quality and medium power are required.

The enclosure of the box is made of ABS of high quality and reduce weight with a black or white textured finished in order to cover the IP protection for environmental conditions: IP-54.

The LS-81T included an adjustable U shape bracket for fixing on wall or ceilings.

The connection is realized by a pressure connecter which is
 located in the rear side of the box. Besides, it includes a power selector for $70 / 100 \mathrm{~V}$ lines and $8 \Omega$.

## Features LS-81T:

- High quality playback
- Lineal frequency response: $80-20,000 \mathrm{~Hz}(+/-5 \mathrm{~dB})$
- Coherent phase response
- Low harmonic distortion
- Power tap selector and low loss transformer ( 70 / 100V / 8 $)$
- Metallic grille: acoustically transparent

## Technical Specifications:

| Model | LDALS81TWS02 |
| :---: | :---: |
| Power supply | 50 W RMS |
| Frequency response I/O | $80 \mathrm{~Hz}-20 \mathrm{kHz}(+/-10 \mathrm{~dB})$ |
| Sensitivity | $88 \mathrm{~dB}+/-3 \mathrm{~dB}(1 \mathrm{~W}, 1 \mathrm{~m})$ |
| Speaker impedance | 8 ohm |
| Dispersion | $90^{\circ}$ horizontal / $80^{\circ}$ vertical |
| COLOUR | Black or White |
| Transformer 70v / 100v | $\begin{aligned} & 50 \text { / } 25 \text { / 12,5 / 6,25 W @ 100V } \\ & 50 \text { / } 25 \text { / 12,5 / 6,25 / 3,12 W @ } 70 \mathrm{~V} 8 \Omega \end{aligned}$ |
| Connector | Pressure Connector |
| Speaker | 8"Woofer and 1"tweeter |
| Bracket (optional | U shape metallic adjustable bracket for mounting on wall or ceiling |
| Dimensions (width x height x depth) | $275 \times 418 \times 255 \mathrm{~mm}$ |
| Weight | 6.6 kg |

## LS-81T

## SPECIFICATIONS FOR ENGINEERS AND ARCHITECTS

The LS-81T will be compound by a 8 " woofer, a 1 " tweeter and a crossover filter. It will be connected to a low loss transformer and will have several power taps: $50 / 25 / 12.5 / 6.25 / 3.12$ for 70 V line and $50 / 25 / 12,5 / 6,25 \mathrm{~W}$ for 100 V line. It will be connected to $70 \mathrm{~V} / 100 \mathrm{~V} / 8 \Omega$ lines. It is recommended to place the acoustic box in vertical position in order to obtain the maximum working functions.

The range of frequencies that it must cover will be comprised between 80 Hz and 20 kHz with a 88 dB sensitivity measured to 1 W and 1 m .

The speaker will be installed horizontally and vertically, where the dispersion will be $90^{\circ}$ and $80^{\circ}$ respectively.
The enclosure will be made in ABS with a metallic grille transparent acoustically. The available colors will be white (RAL 9003) and black (RAL 9005).
The shape of the box will be a $1 / 6$ spare part of a cylinder. It will be provided by an adjustable bracket, which has $U$ shape and could rotate until $180^{\circ}$ angle.
The product fulfills the CE marked.

| Warranty | 2 years |
| :--- | :--- |
| Product Code | LDALS81TS02 |

## Sound tests:

## 1. Power

Pink noise is introduced and amplified trough the whole band width obeying the standar IEC 60268-5. If the maximum power of the speaker is reached, the noise is cut. Then, the speaker is checked. It must not present visible damages or loss of features after 100 hours of working.

## 2. Sensitivity, frequency range and impedance.

It is introduced several sinusoidal impulses which have different frequency to 1 W of power level from the nominal impedance of the speaker. The average sound pressure level (dB-SPL) is measured to 1 meter of distance with regard to the speaker in a anechoic environment.
