

# MSS-6Z Microphone

The MSS-6Z of LDA is a desktop microphone which is designed in order to send messages to different zones. It works together with the CM-436 controller getting all functions belonging to a PA system in reduced dimensions.

It is easy to use due to the message could be send to one or until six zones by means of a selection or send a general call to all previously selected zones.

## Features:

- Light signage for selected zones
- Light signage for Busy Line and Conceded word
- High performance Microphone capsule, specially adapted for catching voice
- The connection is made by external interface to connect it with the installation and power supply source easily.
- Remote microphone power supply with possible connection with a local source in order to avoid level loss through longer cables.
